Inboard one-way drain valve for fast, efficient bailing.

Great handling and stability

Air V floor for superb stability, turning and a smoother ride.

Inflatable

Engine

Domestic Use

Light and fast, the revolutionary air V-floor inflatable gives rib-like performance that smooths out even the choppiest waters and ensures maximum stability at virtually any speed. The hull design also incorporates inflated rear trim pads, for effortless directional agility and additional stern lift. This has the dual benefit of helping the boat to plane with smaller horsepower engines, as well as providing extra buoyancy for larger engines.
